CARDEXCHANGE®

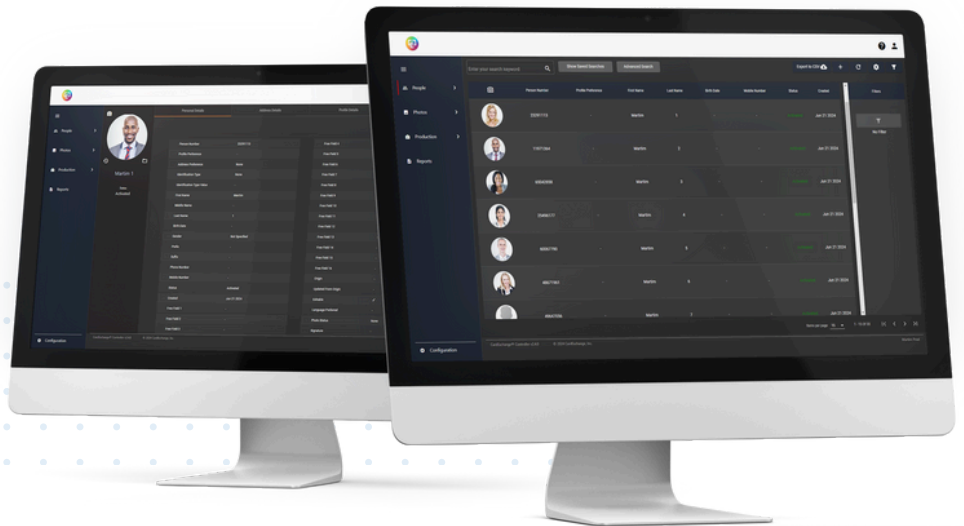

# CLOUD SUITE

## MEET CLOUD SUITE

A revolutionary Way to Let your ID Lead the way

The comprehensive ID management system serves as a unified cloud-centric platform empowering card administrators with complete oversight over their distributed and deployed digital and physical identification cards.

Enterprises and establishments leverage this system to remotely generate, distribute, and oversee digital and physical ID cards, streamlining operations and enhancing security measures.

## FEATURE HIGHLIGHTS

### Key Features

#### Manage Issued Card holders

Activate, block, archive, and restore IDs.

#### Admin Logs

View a history of activities that take place in the ID management system.

## Email Digital ID Enrollment Invitations

Create custom templates for personalized messages. Easily enroll users by sending them an invitation via email to download app.

## API Integrations

Facilitate seamless communication and data exchange between different software systems, enabling enhanced functionality and integration across platforms.

## Role-Based Permissions

Define roles for your administrators and control access within the platform according to their permission settings.

## Personalize ID Design

Personalize your digital and physical ID cards by incorporating custom fields, barcodes, backgrounds, etc.

## Import ID Holder Data

Import ID holder data from different data sources to streamline record management and reduce manual errors

## In-App ID Photo Submission

ID holders have the option to upload their ID photo directly within the ID App, utilizing either their device's camera or selecting from their existing photo library.

## ID Photo Approval

Turn on moderation to control end-user-submitted ID photos by approving or denying them in your IDMS account. End users receive notifications instructing them to re-submit ID photos.

## Mobile Credential for Access Control

As a certified Partner HID Mobile Access & Salto Access Control, users can use their mobile app for access and not just as an ID.

## Document Upload

Allow app users to easily submit their ID information and documentation directly within the app for approval and automated photo comparison.

# ID ISSUANCE IN 1, 2, 3...

Easily Customize Your Cloud

## Define Your Business Rules & Workflows

Our system streamlines the approval process, allowing designated personnel to review and approve ID card requests efficiently. Administrators can configure custom workflows based on organizational requirements, ensuring that each request is handled promptly and accurately.

## Enrollment Process

Our system simplifies the enrollment process, allowing administrators to capture essential information quickly and accurately. Whether it's through manual entry or integration with existing databases, our flexible approach ensures that no detail is overlooked.

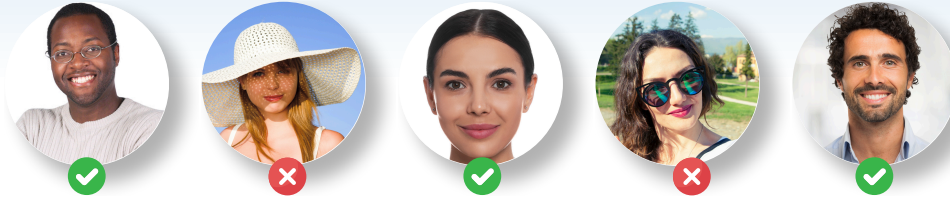

## Photo Capture and ID Design

Our photo capture and ID design tools enable administrators to create professional-looking ID cards effortlessly. With customizable templates and intuitive editing features, administrators can design IDs that reflect their organization's branding while ensuring compliance with security standards.

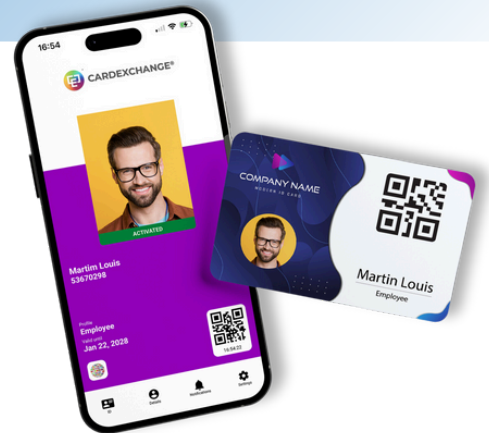

## Approval Workflow

Our system streamlines the approval process, allowing designated personnel to review and approve ID card requests efficiently. Administrators can configure custom workflows based on organizational requirements, ensuring that each request is handled promptly and accurately.

## Printing and Issuance

Once approved, ID cards can be seamlessly printed and issued directly through our cloud-based platform. The CardExchange® Cloud Suite integrates with any networked printer, allowing for secure and efficient printing from anywhere. The system ensures high-quality output every time. Optional features like magnetic stripe encoding and smart card encoding offer flexible solutions to meet a variety of ID requirements.

## Third Party Integration

Our system seamlessly connects with different back offices such as access control systems, HR databases, student databases, and more. With our custom connectors professional services, we can easily push and pull data for live updates. Allowing organizations to manage IDs from a single platform allows you to streamline your workflows and processes.

## Manage Issued IDs

With our robust data management features, administrators can securely store and access ID holders information with ease. Our system employs advanced encryption techniques to safeguard sensitive data, providing peace of mind for both administrators and users.

## Reporting and Analytics

Our comprehensive reporting and analytics tools provide valuable insights into ID card usage, compliance, and security trends. Administrators can generate customizable reports, analyze key metrics, and identify areas for improvement, enabling data-driven decision-making and continuous optimization.

# CLOUD SUITE PRODUCTS

## Admin Center

CardExchange® Admin Center is the central hub of our cloud suite of products. Here, you can configure and manage the Controller and Stand, define business rules, handle user profiles, and set up automated messaging and photo approvals. The Admin Center simplifies the system setup process, making it easy and efficient to manage your credentialing needs.

## Controller

CardExchange® Controller is the core of our cloud suite of products, revolutionizing online credential management. Streamline every step of your ID issuance process with our cutting-edge cloud software. From personalized business rules to lifecycle management and the production of both physical and digital IDs, Controller provides the perfect solution for your credential management needs.

## Stand

CardExchange® Stand is designed to work seamlessly with the Controller, offering a comprehensive online self-service portal for your credential holders. Empower your users by allowing them access to the Stand App, where they can easily upload photos, submit identification documents, receive notifications, activate or block their IDs, and utilize Virtual or Digital IDs, ensuring a streamlined and efficient process.

## Press

CardExchange® Press is a dedicated desktop software for the Controller. Create the perfect ID card design with our feature-rich card designer. With a pre-defined connection to CardExchange® Controller, you can effortlessly manage all your records in the cloud and handle your print production efficiently. Once a card is produced, all records in the Controller are updated automatically.

## Bridge

CardExchange® Bridge is an essential add-on for the Controller, enabling direct connections to your data sources. Whether you need to integrate with an API or any other data source, Bridge offers various options to seamlessly connect with your existing systems, ensuring a smooth and efficient workflow.

## Secure

CardExchange® Secure is a Single Sign-On authentication process that allows users to log in to multiple applications with a single set of credentials. This integration facilitates authentication using external identity providers, enhancing user experience and IT security, ensuring a secure and streamlined access management system.

## ADD ON'S

HID Mobile Access • Salto • HID Fargo Connect®

### HID Mobile Access

Integrating HID Mobile Access® revolutionizes secure and digital access management. Transform your digital IDs into powerful keys for access control, blending robust security with customizable ease of use. This integration enhances operational workflows and enriches user experience within any organization, marking a significant advancement in identity verification and access permissions.

### Salto

Adding Salto to your CardExchange® system enhances security and efficiency within your workflow. It transforms the digital ID into a comprehensive access control tool, allowing you to leverage its advanced security features while optimizing your users' experiences. This integration not only streamlines access management but also reduces the risk of unauthorized entry. With Salto, you can ensure a seamless and secure environment, providing peace of mind for both administrators and users.

### HID Fargo Connect®

HID Fargo Connect® is a cloud-based card issuance platform that elevates the efficiency and security of your card production process. It empowers you to design card templates, personalize credentials, and securely issue them from anywhere in the world. With full printer visibility and control through a real-time dashboard, HID Fargo Connect® enables proactive maintenance and efficient management of printer consumables, enhancing your production experience to a whole new level.
