CARDEXCHANGE® **SECURE**

FEATURE LIST

»»» www.cardexchangeid.com

CARDEXCHANGE® SECURE

Single sign-on (SSO) is an authentication method that allows a user to log in with a single ID to any of several related, yet independent, software systems.

True single sign-on allows the user to log in once and access services without re-entering authentication factors.

CardExchange® Secure is a single sign on (SSO) service that integrates with your security system with the CardExchange® Cloud Suite.

If you want to know if your SSO is supported or how your SSO can be integrated, please contact our sales department.

FLEXIBLE METHODS TO CONNECT

Single sign-on (SSO) has been prevalent in many organizations for years, but its importance is often overlooked and underappreciated. With many enterprises moving to the cloud and taking advantage of third-party services, seamless access to multiple applications from anywhere and on any device is essential for maintaining business efficiency and a seamless customer experience.
