ABOUT CARDEXCHANGE® CONTROLLER

CardExchange® Controller creates a credential management experience that is tailored to each organization. As the heart of the CardExchange® Cloud Suite, it provides a unified platform for organizations to manage, enroll, and issue credentials quickly and easily.

CardExchange® Controller streamlines every step of the enrollment and lifecycle process, securing and controlling your ID management with custom-configured workflows for consistency in issuance, re-issuance, and renewal.

CardExchange® Controller offers a intuitive interface that allows you to easily view and manage all your data in one place. Powerful filters let you customize your data views and keep control over your data, so you can work more efficiently.

The CardExchange® **ADMIN CENTER**

CardExchange® Admin Center is free with every CardExchange® Controller subscription, making it possible for you to create a seamless, flexible, and efficient process as needed.

The Admin Center is your one-stop configuration location where you can manage your own business rules, workflows, interface personalization, permissions, and so much more to create an efficient work environment unique to your organization.

Controller Feature Highlights

CardExchange® Controller is an enterprise-level subscription software that offers users an extensive range of features and options, making it the perfect solution for any organization. Here are some of the most important features that make CardExchange® Controller a one-of-a-kind product:

➤➤ **Person Profile**

You have unlimited options to add users to your system and you can exactly define what they are allowed to do, or not do. Give unlimited access to temporary access by defining active dates. Easily create your own specific roles and assign them to your users.

➤➤ **Reporting**

Reporting and auditing is an important part of the CardExchange® Controller. Standard reports that are provided give specific information about your cardholders. CardExchange® Controller also offers flexible configurable and customizable reports, detailing your internal processes.

➤➤ **Person Management**

It all starts with the person and the position within your organization, presented so that you can easily maneuver between specific information, address details, or set up new profiles and business rules. No more visits to multiple services desks for assigning access controller rights or vending applications: CardExchange® Controller brings it all together, centralized, one-stop enrollment, accessible on any device, anywhere, anytime.

➤➤ **Photo Approval**

The photo approval feature allows you to automatically have your photos approved against historical photos or credentials. You can also compare photos to official identity documentation, such as driver's licenses, and define percentage match rules for automatic approval or manual review requirement.
