CARDEXCHANGE® STAND

An efficient enrollment process cannot be without mobile integrations. Introducing the CardExchange® Stand, a selfservice portal that works in conjunction with our CardExchange® Controller and provides your users with quick and easy access to their account using a phone, a tablet, or a desktop computer.

Allowing the users to verify their personal details, upload their photo, and manage their ID status improves security and prevents unwanted activity. In full enrollment including fulfillment, your users can easily activate their ID when received, without making the trip to a service desk for activation. During the high volume enrollments, for example Universities, the CardExchange® Stand offers the most effective solution to smoothen your enrollment process by including your users and make them a part of the system.

DIGITAL & VIRTUAL ID

Using a virtual or digital ID can allow you to roll out your IDs faster than any card production and mail or pickup service. By using the CardExchange® Stand App you can have the perfect solution. Whether you want to do away with ID cards altogether or enhance your card issuance program with adding digital or virtual IDs, CardExchange® Stand enables you to have the best of both worlds. Virtual IDs present with your own personalized look and feel from colors, logos, and more. Using a virtual ID the user can show their Active ID status easily. Using a virtual ID allows you to quickly deactivate any person instantly and block entrance into your facility. We are currently due (summer 2022) to have support for the HID® Mobile and Salto Digital IDs. Using the Digital ID to work with those access control system and readers brings the ultimate power to not only providing a digital credential but controlling access and movement around your facility with a touch of a button.
