SDK DEVELOPMENT PROGRAM

EMPOWER YOUR INTEGRATIONS

Streamline Your Systems with Custom-Built Connectors

The CardExchange® SDK Development Program enables you to design, build, and certify secure, high-performing integrations tailored to your business needs. Gain the tools, support, and certification to create seamless connections between the CardExchange® Cloud Suite and your existing systems.

What is the SDK Development Program?

The SDK Development Program gives developers and organizations the resources they need to integrate the CardExchange® Cloud Suite with third-party systems like access control, HR management, and student registration.

Whether you're managing complex IT ecosystems or simplifying workflows, this program provides the flexibility, reliability, and control to streamline your integrations with confidence.

Why Choose Our SDK Development Program?

- **Comprehensive Tools**

Access a secure development environment, detailed API documentation, and specialized resources to build high-quality integrations.

- **Certification for Security and Quality**

Ensure your connectors meet the highest standards for functionality, security, and performance with our rigorous certification process.

- **Flexibility and Control**

Take ownership of your custom integrations, tailoring them to fit your unique business needs.

- **Ongoing Support**

Benefit from expert guidance and dedicated resources at every stage—from development to deployment and beyond.

CARDEXCHANGE®

SDK DEVELOPMENT PROGRAM

How It Works

- **1. Enroll in the Program**

Sign up and receive a program orientation, including an introduction to tools, resources, and best practices.

- **2. Access Development Tools**

Utilize a secure environment and explore extensive API documentation to start crafting your integration.

- **3. Develop and Test**

Design, code, and refine your connectors with ongoing support from our technical team.

- **4. Submit for Certification**

Ensure your connector meets rigorous security, functionality, and performance standards.

- **5. Deploy and Maintain**

Launch your certified connector with confidence and keep it updated as systems evolve.

How We Test and Certify Your Connectors

Ensuring the quality, security, and reliability of your integrations is central to the SDK Development Program. Our testing and certification process includes:

- **Security Assessment:** Identify and resolve potential vulnerabilities to safeguard sensitive data.
- **Functionality Validation:** Verify seamless operation within the CardExchange® Cloud Suite.
- **Performance Evaluation:** Test connectors under varying conditions to ensure speed and efficiency, even at peak loads.

Once certified, your connector is licensed for live deployment, guaranteeing a secure and reliable integration.

CARDEXCHANGE®

SDK DEVELOPMENT PROGRAM

Solutions to Common Integration Challenges

The SDK Development Program addresses frequent issues like:

- **Manual Data Handling:** Reduce errors and inefficiencies with automated synchronization.
- **System Mismatches:** Achieve seamless interoperability between systems.
- **Security Risks:** Protect sensitive data with certified, secure integrations.

By resolving these challenges, the program delivers scalable, efficient, and reliable integration solutions.

Discover the Value

Pricing plays an important role in planning your integration journey. Reach out to our team to learn how the SDK Development Program can support your goals, from tailored development tools to expert guidance and certification.

Take the First Step

Seamless integrations are just a step away. Whether you're a developer, solution provider, or IT professional, the SDK Development Program is your gateway to high-performing, secure connectors.
