CARDEXCHANGE® SECURE

CardExchange® Secure is a single sign on (SSO) service that integrates with your security system with the CardExchange® Cloud Suite.

Single sign-on (SSO) is an authentication method that allows a user to log in with a single ID to any of several related, yet independent, software systems. True single sign-on allows the user to log in once and access services without re-entering authentication factors.

THE MAIN FEATURES

✔ Integrate with Identity Providers

Integrate with external identity providers eliminating the need to configure user permissions manually.

✔ Direct Authentication

Improve efficiency by reducing the sign-in and registration process with direct authentication.

✔ Password Management

Easily access services with password management handled by your current identity provider.

✔ Automatic Provisioning

Create and manage user identities and roles for SSO users via the AdminCenter.

✔ Manage Cloud Suite Users

Define which users have what level of access to each service within the CardExchange® Cloud Suite.

✔ Supported Platforms

OpenID Connect (including Microsoft Azure AD); SAML 2.0; Google; Custom domains for web applications
